

TIMU ACADEMY TRUST

Policy Document for: Administration of Medicines

Approved: October 2017

Reviewed: September 2018

Due for Review: October 2019

Introduction

Schools are expected to develop policies on managing medicines, and to put in place effective management systems to support individual children with medical needs. At the schools within the Timu Academy Trust we believe that positive responses to a child's medical needs will not only benefit the child directly, but can also positively influence the attitude of their peers.

All members of staff have a duty to maintain professional standards of care and to ensure that our pupils are safe. In response to the Equality Act 2010, we make reasonable adjustments for disabled school users, including those with medical needs, and we plan strategically to improve access over time. In response to the requirement to support pupils at school with medical conditions we also produce individual healthcare plans and make reasonable adjustments to enable pupils with medical needs to participate fully in all areas of school life including educational visits and sporting activities.

There is no legal or contractual duty on staff to administer medicine or supervise a child taking it. However, some support staff at our schools routinely carry this out. In an emergency, swift action must be taken by any member of staff to assist any child and teachers and school staff have a common law duty of care to act like any reasonably prudent parent. This duty also extends to staff leading activities taking place off site, such as visits, outings or field trips.

This policy statement must be considered in conjunction with the school's health and safety policy.

Objectives and targets

The purpose of this policy, in conjunction with the policy on supporting pupils at school with medical conditions, is to put into place effective management systems and arrangements to support those children with medical needs in our school and to provide clear guidance for staff and parents/carers on the administration of medicines so that all children with a medical requirement can be cared for well while in the school.

Action plan

Non-prescribed medicines eg pain relief are not routinely administered in our schools and are never administered without first checking maximum dosages and when the previous dose was taken. The

prior consent of parents is required if possible and they will, in any case, be informed. Aspirin and ibuprofen are never given unless prescribed by a doctor.

For any child who will need to have medicine administered at school on a regular basis a pupil's healthcare plan will be drawn up in consultation with the school, parents/carers and health professionals. The healthcare plan will outline the child's needs and the level of support required in school. It will be reviewed at least annually.

Under the Management of Health and Safety at Work Regulations 1999 covering the administration of medicines no child under 16 will be given medicines without their parent's written consent so any parent wishing their child to have medication administered must complete the form 'parent request for school to administer medication'. The school must agree to the request by counter-signing the request form.

If a child refuses to take medicine, staff must not force them to do so, but should note this in the records along with the reasons for refusal and any action then taken by the staff member. Parents will be informed of the refusal as soon as possible on the same day. If a refusal to take medicines results in an emergency, the school's emergency procedures should be followed.

Children with medical needs have the same rights of admission to school as other children, and cannot generally be excluded from school for medical reasons. Occasionally though a pupil's presence on the school site represents a serious risk to the health or safety of other pupils, or school staff, and the principal may send the pupil home that day after consultation with the parents. This is not an exclusion and may only be done for medical reasons.

Roles and responsibilities: school staff

The principal, in consultation with the governing body, staff, parents/carers and health professionals will decide how our schools can assist a child with medical needs. The principal is responsible for:

- Implementing the policy on a daily basis.
- Ensuring that the procedures are understood and implemented.
- Ensuring appropriate training is provided.
- Making sure that there is effective communication with parents/carers, pupils, staff and all relevant health professionals concerning pupils' health needs.
- Determining if medication is to be administered in school, and by whom, following consultation with staff. Ensuring that all members of staff are aware of the school's planned emergency procedures in the event of medical needs.

Staff, including supply staff, will be informed of any pupil's medical needs where this is relevant and of any changes to their needs as and when they might arise. All staff, parents and pupils will be informed of the designated person with responsibility for medical care.

All medicine will normally be administered during breaks and lunchtimes. If, for medical reasons, medicine has to be taken during the day, arrangements will be made for the medicine to be administered at other prescribed times. All medication will be kept in the designated cabinet in the school office. Office staff will administer the medicine from here.

Any member of staff giving medicine to a pupil should check on each occasion:

- Name of pupil.
- Written instructions provided by the parents/carers or doctor.
- That the medication is labelled and provided in the original container as dispensed by a pharmacist and includes the instructions for administration, dosage and storage. (The exception to this is insulin which must still be in date, but will generally be available to schools inside an insulin pen or a pump, rather than in its original container).
- Expiry date of the medication and of the request to administer it.

If in doubt about any procedure, staff should not administer the medicines but check with the parents or a health professional before taking further action. If staff have any other concerns related to administering medicine to a particular child, the issue should be discussed with the parent, if appropriate, or with a health professional attached to the school.

Staff must also complete and sign the form school record of the administration of medication each time they give medicine to a child. If the circumstances require an intimate or invasive treatment then this will only take place at the discretion of the principal and governors, with written permission from the parents/carers and only under exceptional circumstances. Two adults, one of the same gender as the child, must be present for the administration of such treatment. Cases will be agreed and reviewed on an annual basis. All such treatments will be recorded.

School staff involved in the administration of medicines will receive training and advice from health professionals. Training for all staff will be offered on a range of medical needs, including any resultant learning needs as and when appropriate. Details of all training will be recorded on the staff training record.

School staff will undertake a risk assessment to ensure the safety of all participants in educational visits and to enable, as far as possible, all pupils to have access to all activities and areas of school life. No decision about a child with medical needs attending/ not attending a school visit will be taken without prior consultation with parents/carers. The same will apply for residential visits and sufficient essential medicines and appropriate health care plans will be taken and controlled by the member of staff supervising the visit. If additional supervision is required for activities, eg swimming, we may request the assistance of the parent/carer.

Roles and responsibilities: parents/carers

We expect parents/carers to administer medication to their children at home if at all possible. Where clinically possible, medicines should be prescribed in dose frequencies which enable them to be taken outside school hours. Medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so.

No medication will be administered without prior written permission from the parents/carers including written medical authority if the medicine needs to be altered (eg crushing of tablets). A 'parent request for school to administer medication' form must be completed.

It is the responsibility of parents/carers to:

- Inform the school of their child's medical needs.
- Provide any medication in a container clearly labelled with the following:
 - The child's name.
 - Name of medicine.
 - Dose and frequency of medication.
 - Any special storage arrangements.
- Collect and dispose of any medications held in school at the end of each term.
- Ensure that medicines have NOT passed the expiry date.

At the start of each school year, parents/carers should give the following information about their child's long-term medical needs. The information must be updated as and when required and at least annually.

- Details of pupil's medical needs.
- Medication including any side effects.
- Allergies.
- Name of GP/consultants.
- Special requirements, eg dietary needs, pre-activity precautions.

- What to do and who to contact in an emergency.
- Cultural and religious views regarding medical care.

Carrying and storage of medicines

For safety reasons, pupils are not allowed to carry medication unless agreed on an individual basis. All other medicines must be handed into the administration office on entry to the school premises. Pupils must be made aware of where their medication will be stored. Teachers may store pupils' inhalers, which must be labelled with the pupil's name. Where children have been prescribed controlled drugs, staff must be made aware that these should be kept in safe custody.

Children should know where their medicines are at all times and be able to access them immediately. Where relevant, they should know who holds the key to the storage facility. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens should be always readily available to children and not locked away. This is particularly important to consider when outside of school premises eg on school trips.

Monitoring and evaluation

The school will monitor and review the individual needs of pupils and administer medicines in order to meet the all-round needs of each child on an on-going basis. An annual report to governors of the administration of medicines throughout the school will be prepared and analysed by the principal to monitor the efficacy of this policy and it will be evaluated in the light of its findings.
