

Discovery Home Learning

Discovery Topic: What goes hoot in the night?

Class: Year 2

Term: 2

This term we will be learning about owls. We would like you to complete four of the activities below (at least one of which must be a piece of writing). These need to be returned to school by the end of term, although photos of your creations should be emailed to the class email address for us to look at, as and when they are completed.

Create a fact file about your favourite type of owl

In Harry Potter he has a pet owl. Design your own feathered companion like Hedwig.

Create a picture or a collage of an owl

Make your own paper feathers

Find out the meaning of
Nocturnal and Diurnal

Listen to the owl song and create your own dance moves. Think about bird movements. If your parents do it with you, even better!

<https://www.youtube.com/watch?v=7kEjZHKXLDg>

Create a tally chart of the
types of birds that you see in
your garden over a week

Create a poem about owls

Create owl Top Trumps

Build an owl nest using resources you have at
home or find outside

As well as these, the expectations for reading remain the same. Children should read at home to an adult at least three times per week (ideally 5). Please record and sign their Reading Record after each read.

Remember that we would love the children to read for pleasure as well, so whatever they read, jot it down.

PE Days!
As the weather is getting colder, don't forget you can bring in tracksuit and if you have earrings, please make sure they are taken out or that you can take them out yourself.

Number bonds, counting and multiplication tables remain a focus and in your year group, children should be confident learning and revising the multiplication tables 2X, 5X and 10X and associated division facts. Although we will not have any formal multiplication/number bond tests, the children will be applying these facts in all of their Maths lessons.

Please feel free to use the Numbots app though. You will have had the login details for before lockdown. It's great for supporting your children with their quick recall of basic addition and subtraction facts!

If you need the login details again, please just let us know.
